

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017

Version: 1.0

Replacement for all previous versions

Effective from: 20.03.2017

Print date: 20.03.2017

Page 1 to 9

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Material name: Standard sand
Synonym: CEN-Standard sand, Control sand, Reference sand, Test sand, Test Dust
EG-Nr.: 238 - 878 - 4
REACH-Registration number: Exception from the registration requirement according to annex V of REACH-Regulation (EC) No. 1907/2006, since natural material.

1.2. Relevant identified uses of the substance or mixture and uses advised against

1.2.1 Use of the material

Standard Sand is a specific quartz sand which characterized by a defined grain size distribution and a high requirement on a steady quality.

Test sand is used for compressive strength testing according to DIN EN 196-1, for production control and certification of CEN standard sand according to DIN EN 169 – 1, for comparing consistency tests of different suspensions measured with rotational viscometers, for functional testing of sieves, for determination of the peak-to-valley height on the surface of horizontal concrete beds, etc. Test Dust is used to verify the performance of vacuum cleaner according to DIN EN 60312:2088-11. Two fractions of standard sand according to DIN 1164:1958.

1.2.2 Uses advised against

None.

Note:

Standard sand has no dangerous properties.
There is no Safety-Data-Sheet to avoid misinterpretations. The information in this Material-Information-Sheet corresponds in form and content to the Material-Information-Sheet according to Annex II of the REACH- Regulation (EC) No. 1907/2006 (REACH).

1.3. Details of the supplier of the Material Information Sheet

Manufacturer/Supplier: Normensand GmbH
Street address/P.O. Box: Hans-Böckler-Straße 20
Country ID/Postcode/Place: 59269 Beckum
Telephone number: +49 2521 / 82 88 80
Telefax: +49 2521 / 82 88 82 0
Information provided by: +49 2521 / 82 88 80 Telephone Administration
E-mail address of competent person responsible for the SDS: normensand@zemnet.de

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017

Version: 1.0

Replacement for all previous versions

Effective from: 20.03.2017

Print date: 20.03.2017

Page 2 to 9

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

2.1.1 Classification according to Regulation (EC) No. 1272/2008 [CLP]

The material is classified as not dangerous according to Regulation (EC) No. 1272/2008 [CLP].

2.1.2 Additional Information

None.

2.2. Label elements

No labeling requirement, because the material is classified as not dangerous according to Regulation (EC) No. 1272/2008 [CLP].

2.3. Other hazards

None.

Standard sand does not meet the criteria for PBT or vPvB according to Annex XIII of the REACH-Regulation (EC) No. 1907/2006.

SECTION 3: Composition/information on ingredients

3.1. Substances

EC-No.: 238 - 878 - 4

EC Name: Standard sand

Purity: 100 %

Additional Information:

The material consists essentially of silicon dioxid SiO₂.

3.2. Mixtures

Not applicable, since the product is a material.

SECTION 4: First aid measures

4.1. Description of first aid measures

Following eye contact

Wash out the sand particles with water. Do not rub eyes dry, because mechanical stress may cause damage to conjunctiva and/or cornea. If irritation persists, consult a physician for safety.

Following skin contact

No first aid measures necessary. Remove sand particles with water. If irritation persists, consult a physician for safety.

Following inhalation

No first aid measures necessary. If feeling unwell, seek medical advice.

Following ingestion

No first aid measures necessary. If feeling unwell, seek medical advice.

Information for the doctor

No allergic reactions known, insoluble quartz sand (silicon dioxide).

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017

Version: 1.0

Replacement for all previous versions

Effective from: 20.03.2017

Print date: 20.03.2017

Page 3 to 9

4.2. Most important symptoms and effects, both acute and delayed

Mechanical skin and eye irritation may occur.

4.3. Indication of any immediate medical attention and special treatment needed

None. If a doctor is consulted, please submit this Material-Information-Sheet.

SECTION 5: Firefighting measures

5.1. Extinguishing media

The material is not flammable.

Suitable extinguishing media: Adapt to the surrounding area.

Unsuitable extinguishing media: None.

5.2. Special hazards arising from the substance or mixture

None.

5.3. Advice for firefighters

No special measures are required, as standard sand do not pose any fire-related hazards. Adapt extinguishing media to the surrounding area.

Special protective equipment for fire fighter

None.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1 For non-emergency personnel

No special measures are necessary. Avoid dust formation. Use appropriate personal protective equipment (see section 6.4).

6.1.2 For emergency responders

Not required.

6.2. Environmental precautions

Not required. Avoid dust formation (see section 6.4).

6.3. Methods and material for containment and cleaning up

Collect spilled material mechanically and keep in suitable containers. By using a vacuum cleaner or wet cleaner with suitable device, a dust development can be avoided.

Spilled material **cannot** be used for standard test application.

6.4. Reference to other sections

For personal precautions:

see section 8

For disposal:

see section 13

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017
Version: 1.0

Replacement for all previous versions
Effective from: 20.03.2017

Print date: 20.03.2017
Page 4 to 9

SECTION 7: Handling and storage

7.1. Precautions for safe handling

- Avoid dust formation.
- Do not eat, drink or smoke in work areas.
- Wear suitable working clothes.
- Wash hands before breaks and after work.

7.2. Conditions for safe storage, including any incompatibilities

No special conditions.

7.3. Specific end use(s)

None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Type of assessment value	Assessment Value		Top limit		origin	Monitoring methods, e.g.
General dust limit						
Workplace limit value	8 h	1,25 mg/m ³ (A) 10 mg/m ³ (E)	2 (II) 15 min	20 (E)	TRGS 900	TRGS 402

A = Alveolar dust fraction
E = Inhalable dust fraction

In case of standard sand, the limit value of grain sizes < 5 µm (A) is 0,15 mg/m³. The limits are met and there is no risk of dust.

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017

Version: 1.0

Replacement for all previous versions

Effective from: 20.03.2017

Print date: 20.03.2017

Page 5 to 9

8.2. Exposure controls

8.2.1 Appropriate engineering controls

Closed systems:

Ensure dust removal systems.

Semi-closed or open systems:

Ensure dust removal systems or a good ventilation or moistening of the material.

8.2.2 Individual protection measures, such as personal protective equipment

General:

Do not drink, eat or smoke at work. Wash hands before breaks and after work.

Eye/face protection:

There is no direct exposure to the material standard sand. If the laboratory and working conditions (use of further substances) are appropriate, wear protective goggles.

Skin protection:

There is no direct exposure to the material standard sand. If the laboratory and working conditions (use of further substances) are appropriate, wear suitable gloves.

Inhalation protection:

In case of dust development, it is appropriate to wear a dust mask type P1 or FFP1 (DGUV Regulation 112 – 190 (use of respirator)).

8.2.3 Environmental exposure controls

Not necessary.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

- | | |
|--|---|
| a) Appearance: | fine quartz sand / gray to yellow-brown |
| b) Odor: | odorless |
| c) Odor threshold: | none, since odorless |
| d) pH (T = 20 °C): | neutral |
| e) Melting point: | 1500 °C |
| f) Initial boiling point and boiling range: | not applicable |
| g) Flash point: | not applicable |
| h) Evaporation rate: | not applicable |
| i) Flammability (solid, gas): | not-flammable |
| j) Upper/lower inflammability or
Explosion limit: | not applicable |
| k) Vapor pressure | not applicable |
| l) Vapor density: | not applicable |
| m) Relative density: | 2,55 g/cm ³ - 2,70 g/cm ³ bei 20 °C |
| n) Solubility (T = 20 °C): | insoluble |
| o) Partition coefficient: | not applicable |
| p) Auto-ignition temperature: | not applicable |
| q) Decomposition temperatur: | not applicable |

Page 6 to 9

- r) **Viscosity:** not applicable, as is not a liquid
- s) **Explosive properties:** not explosive
- t) **Oxidizing properties:** not applicable

9.2. Other information

Standard sand is a solid material.

SECTION 10: Stability and Reactivity

10.1. Reactivity

This material is not reactive under normal ambient conditions.

10.2. Chemical stability

This material is stable under normal ambient conditions.

10.3. Possibility of hazardous reactions

No known hazardous reactions.

10.4. Conditions to avoid

There are no specific conditions known which have to be avoided.

10.5. Incompatible materials

There is no additional information.

10.6. Hazardous decomposition products

Not applicable, since there is no hazardous reactions known.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Standard sand (quartz sand) has no toxicological effects.

- a) **Acute toxicity (oral, inhalation und dermal):** not toxic.
- b) **Skin corrosion/irritation:** not corrosive or irritating.
- c) **Serious eye damage/irritation:** causes slight to moderate irritation.
- d) **Sensitization of Respiratory/Skin:** not sensitizing.
- e) **Germ cell mutagenicity:** not mutagenic.
- f) **Carcinogenicity:** not cancer-inducing.
- g) **Reproductive toxicity:** not toxic for reproduction.
- h) **Specific target organ toxicity (STOT) – single exposure:** not toxic for single exposure.
- i) **Specific target organ toxicity (STOT) – repeated exposure:** not toxic for repeated exposure.
- j) **Aspiration hazard:** not hazardous.

Material-Information-Sheet

NORMENSAND
Made in Germany

according to Regulation (EC) No. 1907/2006 (REACH) paragraph 32 (non-hazardous substances)

Product: **Standard sand**

Revised: 20.03.2017

Version: 1.0

Replacement for all previous versions

Effective from: 20.03.2017

Print date: 20.03.2017

Page 7 to 9

SECTION 12: Ecological information

Negative environmental impacts are not known. Standard sand (quartz sand) is a weathering product of crystalline rocks of the earth's crust, which are removed from the sedimentary layers near the surface.

12.1. Toxicity

- The material shall not be classified as hazardous.
- No aquatic toxicity.
- Non-toxic in sewage treatment plants.

12.2. Persistence and degradability

- Not applicable: inorganic substance.
- No photo- or chemical degradability and no biodegradability expected..

12.3. Bioaccumulative potential

- Not applicable: inorganic substance.
- Significant bioaccumulation is not expected

12.4. Mobility in soil

- Slight to non-mobile in solid.
- Elution of the main components (SiO_2) is not expected.

12.5. Results of PBT and vPvB assessment

This material does not meet the criteria for classification as PBT or vPvB.

12.6. Other adverse effects

- No other adverse effects known.
- According to the CLP regulation, the material is not classified as dangerous to the environment.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

13.1.1 Packaging

Dispose of completely emptied packing according to national regulations or recycle.

13.1.2 Waste treatment

Residues of quartz sand can be disposed as non-hazardous waste. The national disposal regulations apply. No further waste treatment is required.

13.1.3 Further recommendations for disposal

Spilled material can be collected and used for applications with reduced requirements on e.g. grain size distribution. Spilled material **cannot** be used for standard test application.

Material-Information-Sheet

NORMENSAND

Page 8 to 9

SECTION 14: Transportinformation

Standard sand is no subject to transport regulations (IMDG, IATA, ADR/RID). No dangerous goods classification is required.

14.1. UN number

Not applicable.

14.2. UN proper shipping name

Not applicable.

14.3. Transport hazard class(es)

Not applicable.

14.4. Packing group

Not applicable.

14.5. Environmental hazards

Not applicable.

14.6. Special precautions for user

Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulatory Information

- Regulation (EC) No. 1907/2006 of the European Parliament and the Council of 18. December 2006 for the registration, evaluation, authorization and restriction of chemicals (REACH), with additions.
- Regulation (EC) No. 1272/2008 of the European Parliament and the Council of 16. December 2008 on the classification, labeling and packing of substance and mixtures, with amendments: The material is not classified as dangerous according to Regulation (EC) No. 1272/2008 [CLP].

National legislation/requirements

- TRGS 900 Occupational Exposure Limits (Genaeal Dust Limits)
- Hazardous Substances Ordinance (GefStoffV), Prohibition of Cemicsals Ordinance (ChemVerbotsV)

15.2. Chemical Safety Assessment

No Chemical Safety Assessment has been carried out for standard sand.
